## DETAILED ACTION

### *Specification*

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as **"means"** and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the replete use of the term "means" (i.e., lines 1-3). Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3671

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-9 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurworth '625. Hurworth discloses a slopeboard mounting device (figures 1-7) having a rigid shaft 60 having a first end (at 24) and a second end (at 64), means for attaching the rigid shaft (via pinned assemblies 88, 90; as seen in figure 3) to a slopeboard frame (28,30,22), the means for attachment being located near the first end of the shaft (as seen in figure 2) and a means (90 degree members 56 & 62) for indicating a desired location of a mounting lug 66, the means for locating being located near the second end (connected in the area of reference numeral 64, as seen in figure 2). Also, Hurworth shows the means for attachment (figures 3 and 5) having at least two holes (92, 97, 108) through which bolts can be placed.

### ***Allowable Subject Matter***

Claims 3-6 and 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
